

Hong Kong Public Opinion Program of Hong Kong Public Opinion Research Institute

PopPanel Research Report No. 79 cum Community Democracy Project Research Report No. 62 cum Community Health Project Research Report No. 58

Survey Date: 10 to 24 May 2021

Release Date: 25 May 2021

Copyright of this report was generated by the Hong Kong Public Opinion Program (HKPOP) and opened to the world. HKPOP proactively promotes open data, open technology and the free flow of ideas, knowledge and information. The predecessor of HKPOP was the Public Opinion Programme at The University of Hong Kong (HKUPOP). "POP" in this publication may refer to HKPOP or HKUPOP as the case may be.

Part 1: Community Democracy Project: Community Health Module

Research Background

Initiated by the Hong Kong Public Opinion Research Institute (HKPORI), the "Community Integration through Cooperation and Democracy, CICD" Project (or the "Community Democracy Project") aims to provide a means for Hongkongers to re-integrate ourselves through mutual respect, rational deliberations, civilized discussions, personal empathy, social integration, and when needed, resolution of conflicts through democratic means. It is the rebuilding of our Hong Kong society starting from the community level following the spirit of science and democracy. For details, please visit: https://www.pori.hk/cicd.

The surveys of Community Democracy (CD) Project officially started on 3 January 2020, targeting members of "HKPOP Panel" established by HKPORI in July 2019, including "Hong Kong People Representative Panel" (Probability-based Panel) and "Hong Kong People Volunteer Panel" (Non-probability-based Panel). This report also represents Report No. 79 under HKPOP Panel survey series, as well as Report No. 62 under the CD Project survey series. Since CD Project aims to gauge the opinions of members in different communities, HKPORI needs to continuously recruit new panel members and map their profile with their respective constituency areas to form "HKPOP Community Panel" including "Community Representative Panel" and "Community Volunteer Panel" first, and then conduct the research.

In view of the outbreak of Novel Coronavirus (also known as "Wuhan Pneumonia") in late January 2020, HKPOP kick-started the "Community Democracy Project: Community Health Module" or "Community Health Project" using a PopPanel survey design to study the public's views on the epidemic and the Government's relevant polices using small communities such as housing estates as the unit of analysis. The survey covers people's views on their perceived chance of contracting pneumonia, appraisal on the government's handling of the disease, impacts of the border closure, calls for strike by frontline medical staff, community outbreak, work-from-home arrangement, immigration controls, general use of face masks as well as the government's implementation of relevant policies. This is the Report No. 58 under the Community Health Project survey series. The special feature of the Community Health Project is the lowering of respondents' age bracket to 12 years old, in order to obtain more comprehensive samples.

HKPOP sent out emails to all panel members at the beginning of the survey, inviting them to fill in the questionnaire at the designated online platform. Members were allowed to make repeated submissions, while only the last submission of each individual member would be used for analysis.

Contact Information

Herewith the contact information of the "Community Health survey":

Table 1: Detailed Contact Information

Survey method	Online survey							
Target population	HKPOP Panel samples, namely H	HKPOP Panel samples, namely Hong Kong People Representative						
	Panel (Probability-based Panel) ar	nd Hong Kong People Volunteer						
	Panel (Non-probability-based Pan	el)						
Weighting method	The figures are rim-weighted acco	he figures are rim-weighted according to 1) gender-age distribution of						
	Hong Kong population and by Dis	strict Councils population figures						
	from Census and Statistics Depart	ment; 2) Voting results of District						
	Councils Election from Registration	, , ,						
	distribution of Chief Executive from	om regular tracking surveys.						
Date of survey	May 10, 3pm – May 24, 3pm							
Total sample size	Probability-based Panel: 1,068	Non-probability-based Panel: 8,511						
Response rate	Probability-based Panel: 11.9%	robability-based Panel: 11.9% Non-probability-based Panel: 10.0%						
Sampling error [1]	Sampling error of percentages at	Sampling error of percentages at						
	+/-3% at 95% confidence level	+/-1% at 95% confidence level						

^[1] All error figures in this release are calculated at 95% confidence level. "95% confidence level" means that if we were to repeat a certain survey 100 times with different random samples, we would expect 95 times having the population parameter within the respective error margins calculated. Because of sampling errors, when quoting percentages, journalists should refrain from reporting decimal places, whereas one decimal place can be used when quoting rating figures.

PopPanel Composition

Regarding data collection, survey data from both the Hong Kong People Representative Panel and Hong Kong People Volunteer Panel were collected in the form of online questionnaire.

Among them, the Hong Kong People Representative Panel comes from members of the "HKPOP Panel" recruited in regular random telephone surveys. HKPOP uses "HKPOP Panel" as a framework for conducting surveys for different research projects, any eligible family member in the household may be invited to participate in a specific research.

Meanwhile, members of the Hong Kong People Volunteer Panel are recruited online. Citizens only need to self-register in HKPORI website to participate in online questionnaires.

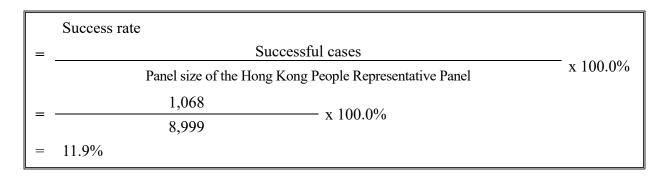

All panel data collected will be adjusted using rim-weighting, to minimize the effects of self-selection bias or participation bias. Details are documented in the Weighting Procedure section.

Response Rate

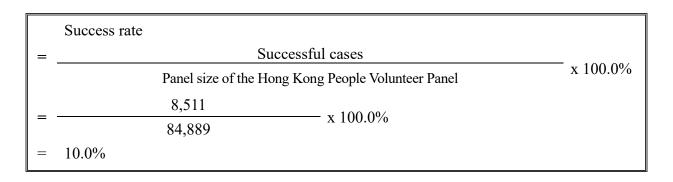

HKPOP adopts a set of contact definition in compliance with most international standards. Historically, the social research community in Hong Kong has developed its own set of contact rates, cooperation rates, response rates, and so on. HKPOP normally reports the "success rate" for online surveys.

The calculation of the success rates in this study refers to the following tables.

<u>Table 2: Calculation of success rate of the Hong Kong People Representative Panel (by HKPOP definition)</u>

<u>Table 3: Calculation of success rate of the Hong Kong People Volunteer Panel (by HKPOP definition)</u>

3

Weighting Procedure

HKPOP has continuously adopted and enhanced its weighting method over the past few decades. For this survey, HKPOP adopts a "2 by 5 by 18 by 3 by 13" weighting procedure involving five variables, namely, gender, age, district (18 cells), voting record (3 cells) and rating of Chief Executive (13 cells). Basically, the raw data of practically all random telephone surveys conducted by HKPOP are rim-weighted by the figures obtained from the Hong Kong Census and Statistics Department and/or Registration and Electoral Office so that the marginal distribution of the sample in terms of gender and age would match with that of the general population figures from the Hong Kong Census and Statistics Department. The marginal distribution of the sample in terms of district and voting record would match that of the general population figures from the Hong Kong Census and Statistics Department and/or Registration and Electoral Office. The marginal distribution of the sample in terms of "rating of Chief Executive" would match that of the general population in HKPOP's regular tracking surveys. This rim-weighting method (sometimes called raking) is found to be the most practicable method in processing HKPOP's survey data.

Specifically, the gender and age groupings used for weighting are as follows:

- Male 12-29
- Male 30-39
- Male 40-49
- Male 50-59
- Male 60 or above

- Female 12-29
- Female 30-39
- Female 40-49
- Female 50-59
- Female 60 or above

The districts used for weighting are as follows:

- Central and Western
- Wan Chai
- Eastern
- Southern
- Yau Tsim Mong
- Sham Shui Po
- Kowloon City
- Wong Tai Sin
- Kwun Tong

- Tsuen Wan
- Tuen Mun
- Yuen Long
- North
- Tai Po
- Sai Kung
- Sha Tin
- Kwai Tsing
- Islands

The voting records used for weighting are as follows:

- Candidates of pro-democracy camp
- Candidates of non-pro-democracy camp
- Did not vote / blank/void vote

The "rating of Chief Executive" groupings used for weighting are as follows:

- 0 mark
- 1-9 mark(s)
- 10-19 marks
- 20-29 marks
- 30-39 marks
- 40-49 marks
- 50 marks

- 51-60 marks
- 61-70 marks
- 71-80 marks
- 81-90 marks
- 91-99 marks
- 100 marks

Quantitative Analysis Results

Quantitative analysis results of the "Community Health survey", after applying the standard weighting procedures, are as follows:

Table 4: Q1 Survey results, by panel type; Survey period: 10-24/5/2021

	Hong Kong	g People Represent (Base=1,063)	ative Panel	Hong Kong People Volunteer Panel (Base=8,494)			
Opinion Question ^[2]	Don't know / hard to say	Try to predict Average		Don't know / hard to say	! Try to predict !		
Q1 What do you think is your chance of being infected with novel coronavirus pneumonia, also known as Wuhan pneumonia, in the coming one month? [Logarithmic Scale]	24%	76%	10%	22%	78%	10% ^[3]	

^[2] Answer options included: 0-10 rating scale, others and don't know / hard to say. Answer options changed from linear scale to logarithmic scale since Oct 2020. Questions asked remain unchanged while options of lower probability are further broken down and increase gradually in logarithmic scale.

^[3] The difference between the figure and the result from the previous survey has gone beyond the sampling error at 95% confidence level, meaning that the change is statistically significant prima facie. However, whether the difference is statistically significant is not the same as whether they are practically useful or meaningful, and different weighting methods could have been applied in different surveys.

Chart 1: Q1 Combined Chart, by panel type

Assessment of the public's expected chance of COVID-19 infection

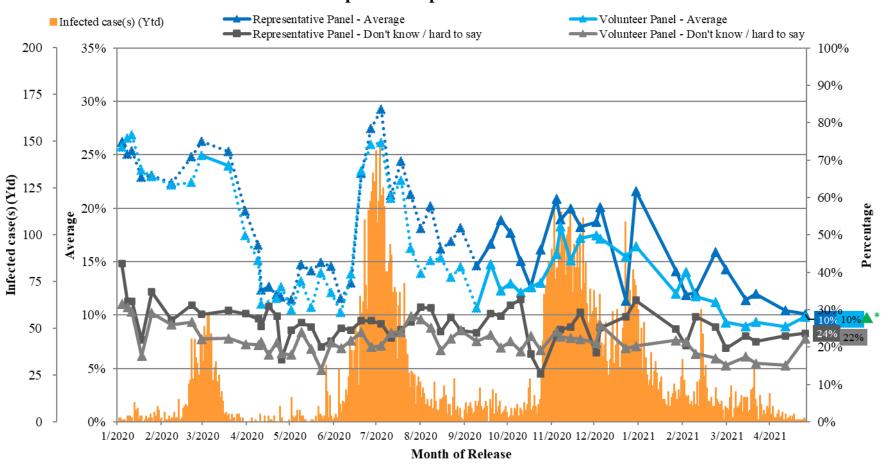

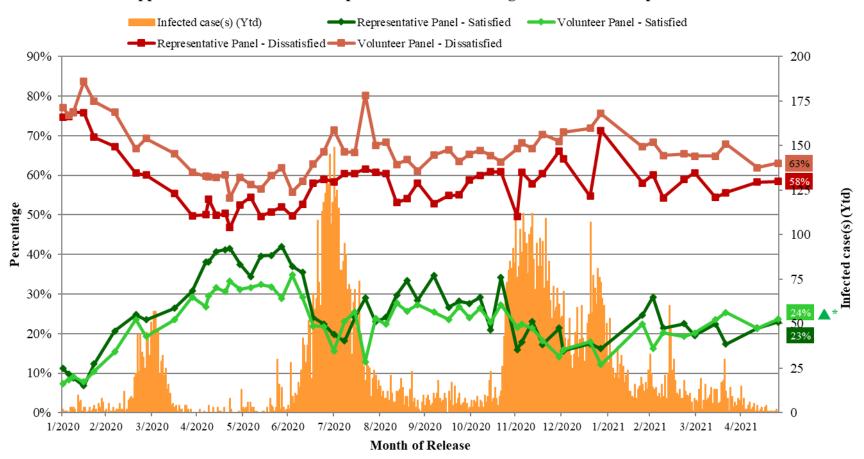

Table 5: Q2 Survey results, by panel type; Survey period: 10-24/5/2021

	Hong Kong	People Repres	entative Panel (Base=1,067)	Hong Kong People Volunteer Panel (Base=8,506)				
Opinion Question ^[4]	Satisfied	Half-half	Dissatisfied	Mean ^[5]	Satisfied	Half-half	Dissatisfied	Mean ^[5]	
Q2 How satisfied or dissatisfied are		100/	58%	2.2			63% ^[6]		
you with the government's	23%				24%	13% ^[6]		2.2	
performance in handling novel	2370	19%	3070	۷.۷	∠ 4 70	1570	US 70181	2.2	
coronavirus pneumonia?						 			

- [4] Answer options included: very much satisfied, somewhat satisfied, half-half, somewhat dissatisfied, very much dissatisfied and don't know / hard to say.
- [5] The mean value is calculated by quantifying all individual responses into 1, 2, 3, 4, 5 marks according to their degree of positive level, where 1 is the lowest and 5 the highest, and then calculate the sample mean.
- [6] The difference between the figure and the result from the previous survey has gone beyond the sampling error at 95% confidence level, meaning that the change is statistically significant prima facie. However, whether the difference is statistically significant is not the same as whether they are practically useful or meaningful, and different weighting methods could have been applied in different surveys.

Wh	at do you think is the appropriate timing to completely lift the regulation prohibiting gatherings
of n	ore than a specific number of people in public places under the pandemic?
(Plea	se select the closest answer; If there is no suitable answer at all, please select "don't know / hard to say".)
\bigcirc	Should completely lift the regulation prohibiting gatherings of more than a specific number of
	people in public places unconditionally \rightarrow Skip questions related to this regulation
\bigcirc	Number of recovered cases exceeds newly confirmed cases each day
\bigcirc	Number of newly confirmed cases each day falls to a single digit
\bigcirc	No more newly confirmed local case
\bigcirc	No more newly confirmed local or imported case
\bigcirc	No more newly confirmed local case in L consecutive days (Please input L in the next page)
\bigcirc	No more newly confirmed local and imported case in N consecutive days (Please input N in the next
	page)
\bigcirc	Don't know / hard to say
pro	do you think there should be before it is appropriate to completely lift the regulation nibiting gatherings of more than a specific number of people in public places?
and	many consecutive days (the value of N mentioned before) with no more newly confirmed local imported case do you think there should be before it is appropriate to completely lift the lation prohibiting gatherings of more than a specific number of people in public places?
Cor	nmunity Health
Hov	many newly confirmed cases each day should there be before it would be appropriate to
pro	nibit gatherings of more than 2 people?\n[The pandemic should be at its worst; For reference,
thei	e are 12 newly confirmed cases on February 23, 2021]
(To c	pt for "don't know / hard to say", please input 99999)

	v many newly confirmed cases each day should there be before it would be appropriate to	
_	hibit gatherings of more than 4 people?\n[The number of newly confirmed cases should be	
fewer than that in the previous question]		
(To c	ppt for "don't know / hard to say", please input 99999)	
How	v many newly confirmed cases each day should there be before it would be appropriate to	
_	hibit gatherings of more than 8 people?\n[The number of newly confirmed cases should be	
	er than that in the previous question]	
(To c	ppt for "don't know / hard to say", please input 99999)	
Hov	v many newly confirmed cases each day should there be before it would be appropriate to	
pro	hibit gatherings of more than 16 people?\n[The number of newly confirmed cases should be	
few	er than that in the previous question]	
(To c	pt for "don't know / hard to say", please input 99999)	
Oth	er Opinions	
Hov	v satisfied or dissatisfied are you with the government's performance in handling novel	
core	onavirus pneumonia?	
\bigcirc	Very much satisfied	
\bigcirc	Somewhat satisfied	
\bigcirc	Half-half	
\bigcirc	Somewhat dissatisfied	
\bigcirc	Very much dissatisfied	
\bigcirc	Don't know / hard to say	
	ase rate on a scale of 0 to 100 your extent of support to the Chief Executive Carrie Lam, with 0	
	cating absolutely not supportive, 100 indicating absolutely supportive and 50 indicating half-	
half	. How would you rate the Chief Executive Carrie Lam?[For weighting purposes only]	

(To opt for "don't know / hard to say", please input 8888)
